

Taylor Jean

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in AI. Proven track record of creating and implementing successful front and back-end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs

December 2021 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full-stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Musician Tracker (Fullstack Web App) – Musicians can track their practice sessions, add notes, and see how many days in a row they practiced, and for how long each day.

Journal Today (Fullstack Web App) – Users can login to their profile and find their list of journal entries. They can add new entries through an input, which they can then edit or delete all entries in their profile.

Other Projects: Ayeshas Hair Salon Website, Level Ground MMA Website, Twisted Fork Cuisine, and many more.

Freelance Full Stack Web Developer

January 2019 — Present

Created full-stack web applications and static websites for different clients across small and medium-sized businesses. Also, consulted on SEO and social media strategy.

Senior Technician at Nucor Environmental Solutions LTD.

June 2017 — December 2021

Worked closely with clients to provide a range of contractor services in various industrial settings.

VOLUNTEERING

Armoury Studios

March 2020 — Present

Helped organize, maintain, and set up recording sessions for bands, and artists.
